

Wi-Fi TELEPHONY FOR THE ENTERPRISE

- Leverage Wi-Fi wireless LAN infrastructure for voice and data applications
- Dramatically improve mobility, responsiveness and productivity
- Deliver superior voice quality and digital features throughout the workplace
- Integrate seamlessly with legacy and IP PBX systems
- Proven durability for use in all business environments
- Operate easily without extensive training

The Wireless Convergence Solution

NEC, the leader in workplace Wi-Fi Telephony, offers the industry's most comprehensive portfolio of devices for enterprise wireless networks. MH100 Series Mobile Handset operate on a converged voice and data infrastructure to reduce costs and simplify management while significantly improving employee mobility, responsiveness and productivity. MH100 Series Wireless Telephones provide the richest possible functionality while integrating with a broad range of enterprise applications and networks.

MH Mobile Handsets

MH110 MOBILE HANDSET

The MH110 Mobile Handset supports a broad range of enterprise applications and is ideally suited for the general office, financial or hospitality industries. This compact handset offers a rich set of features including a high-resolution graphic display, menu-driven functions and messaging capability — all within a lightweight, ergonomic design. The MH110 Mobile Handset provides exceptional voice quality and mobility at an affordable price. Carrying options and accessories are available to suit users in every work environment.

MH140h MOBILE HANDSET

The MH140h Mobile Handset is uniquely designed to meet the challenging needs of the healthcare setting. The small and lightweight design is ideal for healthcare workers who are constantly on the move. NEC's innovative design, advanced manufacturing and testing process ensures the MH140h Mobile Handset is durable enough to withstand the rigors of the healthcare environment. Because healthcare institutions operate on a 24-hour basis, the MH140h Mobile Handset comes standard with a backlit display and keypad for dimly lit conditions. Supported charging options include single, dual and quad chargers to ensure that fresh Battery Packs are rapidly available for round-the clock operation.

MH120 MOBILE HANDSET

The MH120 Mobile Handset is the industry's most durable handset for workplace applications. Only NEC combines innovative design, advanced manufacturing and testing processes to ensure handset durability. The six-ounce MH120 Mobile Handset is extremely simple to use, requires minimal training and is durable enough to withstand the rigors of an industrial environment. Push-to-talk functionality is also available for broadcast communication between employees, eliminating the need for two-way radios or walkie talkies. The large earpiece seals out background noise and provides comfort for frequent or lengthy calls. A complete set of accessories is available including headsets, chargers and carrying cases.

NEC — PUTTING WIRELESS TO WORK

NEC helps thousands of commercial enterprises improve productivity, responsiveness and customer service. The comprehensive portfolio of workplace devices combined with a standards-based architecture, enterprise telephony integration and exceptional voice quality, makes NEC the right choice for Wi-Fi telephony.
